HETERO TAXY AWARENESS DAY 2022

Can you identify the organs often affected by heterotaxy?

intestines

spleen

stomach

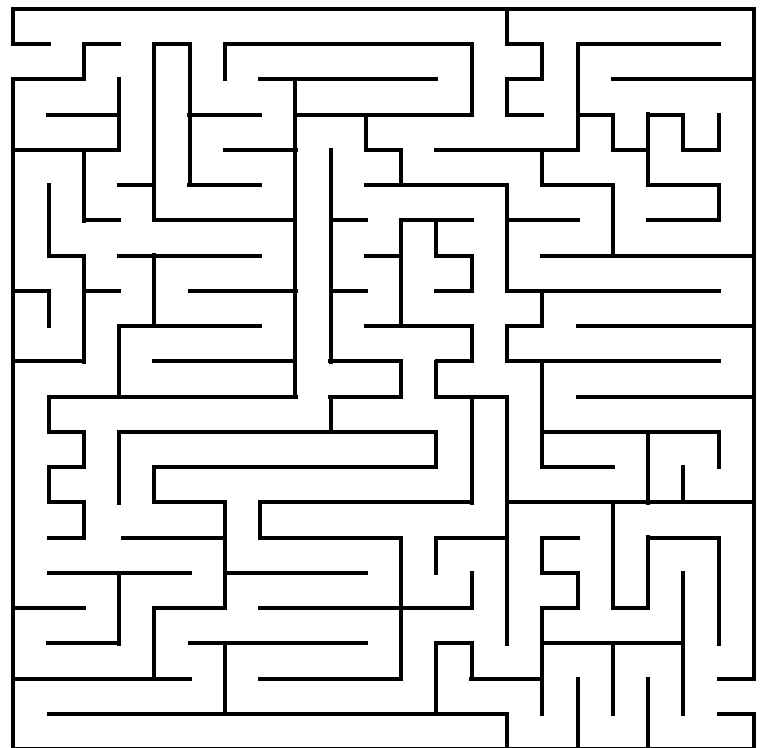

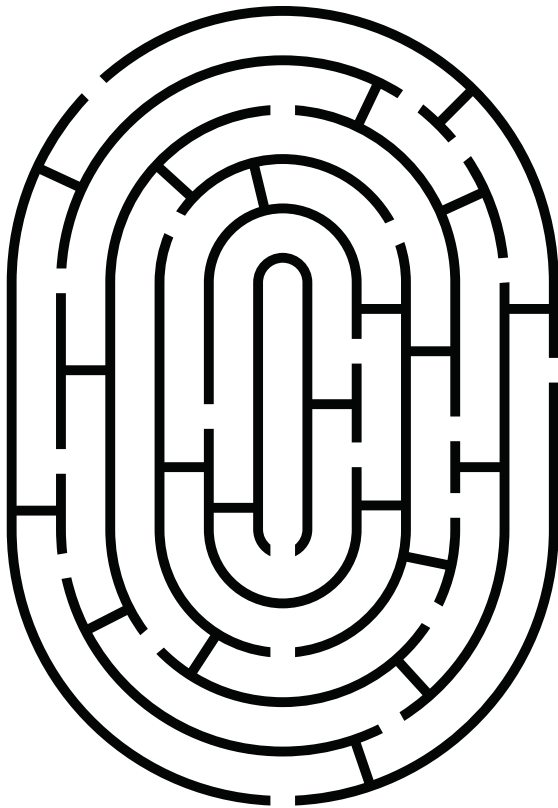

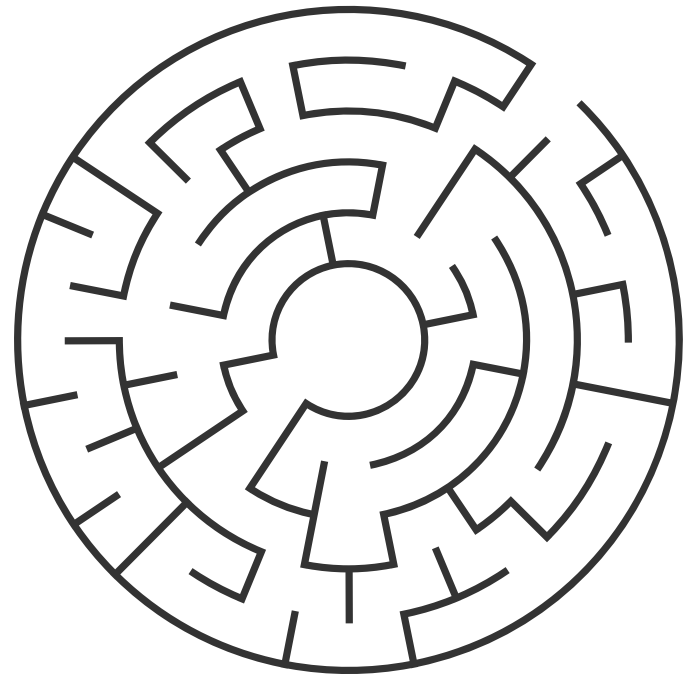

lungs

heart

liver

Figuring out how to live with heterotaxy syndrome can sometimes feel like navigating through a maze.

Can you solve these ones?

HETEROTAXY AWARENESS DAY 2022

It can be confusing to live with heterotaxy; sometimes it feels like a giant riddle. Here are a few easier ones for you to solve.

What do you call a cat who loves to swim?

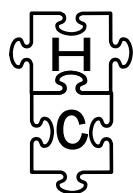

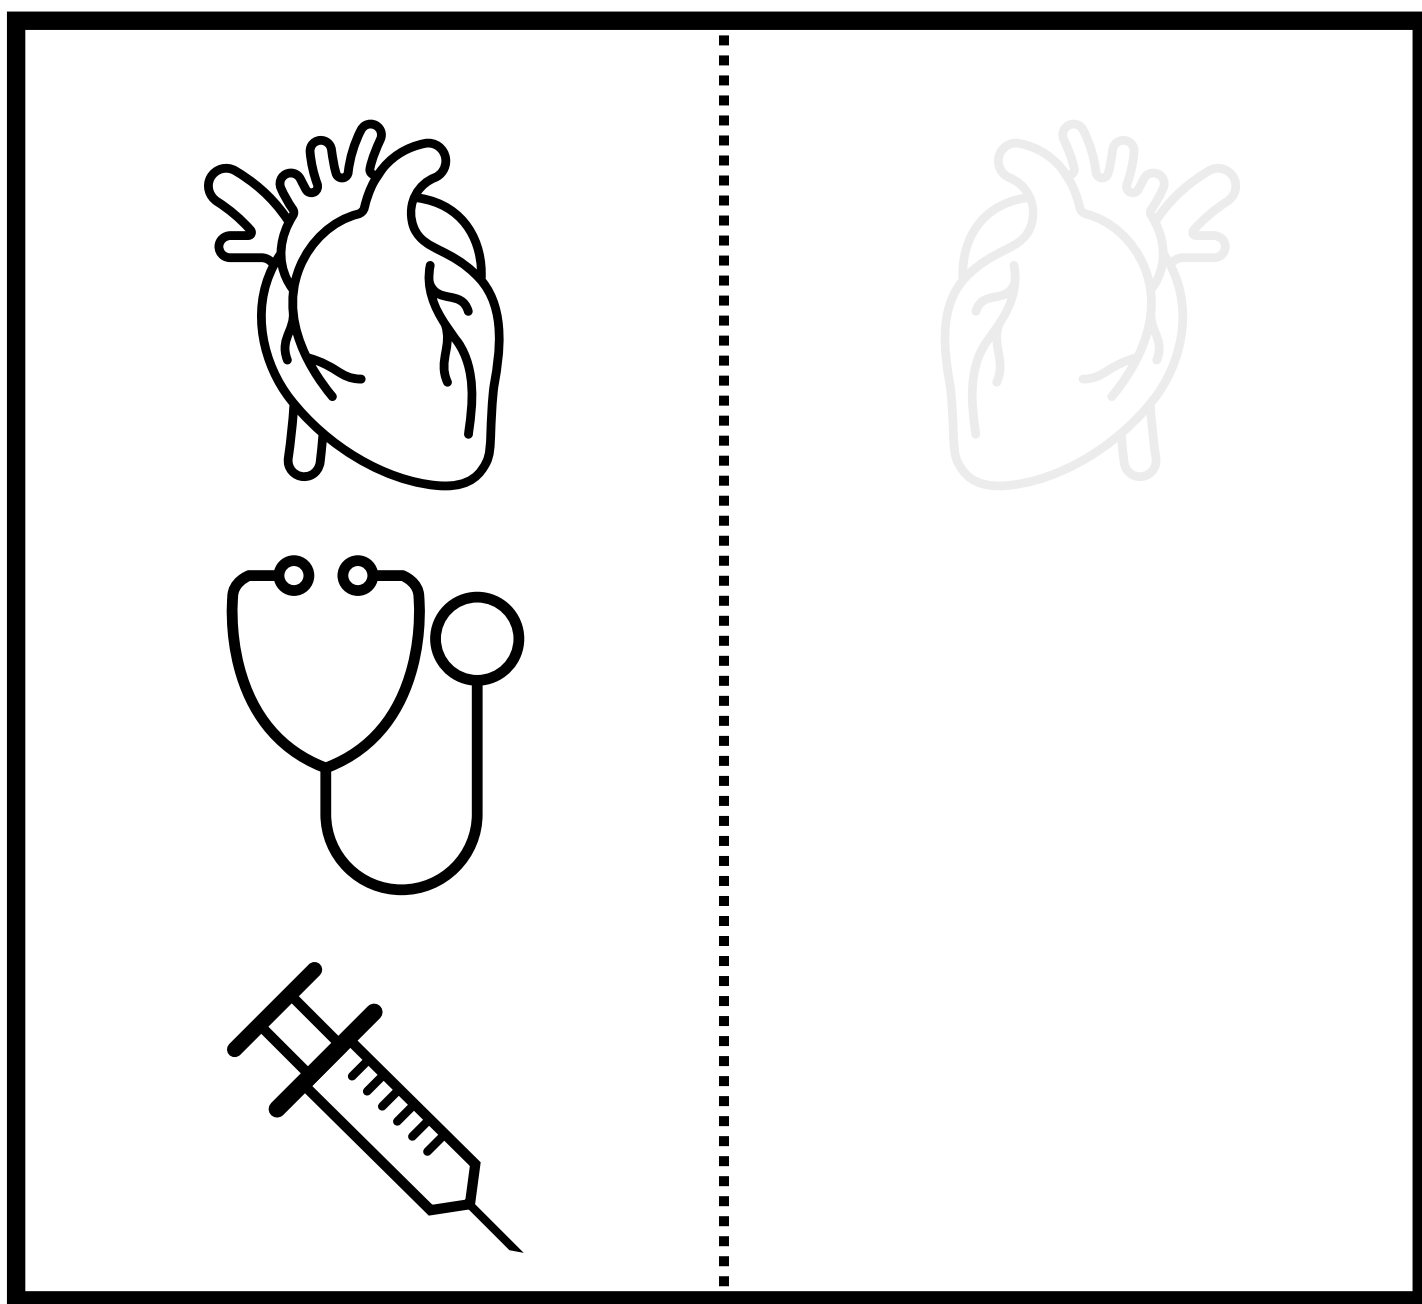

What travels around the world but still stays in one spot?

Come up and we go, drop and we stay. What am I?

Answers: A catfish, a stamp, an anchor

Sometimes kids with heterotaxy are born with what we call "mirror-image" organs, flipped from left to right. Can you draw the pictures on the left flipped on the right?
